(269) 547 -8970

New this year!

The class: For students in K – 3rd grade, with emphasis in communication, repetition and basic vocabulary. We will learn the alphabet, songs, vocabulary and games.

We will use videos, coloring, crafts, songs, games and movement to learn Spanish!

Why learn Spanish: Spanish is a language spoken in 21 countries and approximately 442 million people in the world. The demand for bilingual workers has been increasing in industries like health care, hospitality, education, law enforcement, customer service, social services, Finance and Communication. Spanish is the most popular non-English language spoken in USA with roughly 34 million speakers nationwide.

Teaching Philosophy: I believe that: people have a natural inclination to learn. The learning process has more meaning when the subject has relevance for the learner. Learning through participation is more effective than only receiving instruction. Learners are the ones that drive the learning process. Learning flourishes in a positive, stress-free environment.

The instructor: I am from Venezuela. I have been teaching Spanish for more than 10 years to children k-3, upper elementary, middle school, high school and adults.

Fees: \$ 360/year.
