

# Consumer Math

10<sup>th</sup>-12<sup>th</sup> Grade

Prerequisites- Algebra

1 Math Credit for full course

## Course Description

How do I file a tax return? What is a credit score? How much of my paycheck will be withheld for taxes? What's an APR? This consumer math curriculum answers all of these questions, and more! This is a practical math class that builds financial literacy in our students. This is math that your student will use. This course is geared toward upper level high school students who need another credit of math, or are interested in how to manage money as an adult. We will also discuss handling our resources in a God honoring way, and take a look at finances through a Biblical worldview.

Students should be prepared to spend 20-30 minutes per day completing course work. Parents are an integral part of a student's success in this class. An email will be sent after each class to communicate homework expectations for the week.

## Course Materials

Please obtain the following:

*Money Matters for Teens* by Larry Burkett with Marnie Wooding

- ISBN: 978-0-8024-4636-7
- Cost: \$13

- \$190 due on the first day of the first semester
- \$190 due on the first day of the second semester
- Cost includes classroom activities, handouts, and classroom rent
- If a student needs to drop this class in the first two weeks of the semester tuition will be refunded. After two weeks the tuition is non-refundable.

## Tutor

Erin Crane graduated from Michigan Technological University with a B.S. in Environmental Engineering. After a short stint as an engineer, a passion for teaching young people prompted me to earn a teaching certificate in Science and Mathematics. I worked as a substitute teacher, and taught at Battle Creek Central until our first child was born. Along with homeschooling our three children, I have also tutored many other students. I am dedicated to teaching the wonders of the Creator that are evident in those tough, but rewarding, disciplines of science and math.
